**Scienceceuticals Celebrates 4<sup>th</sup> Anniversary**  
*Local company proud and prosperous after four years in business*

SUMMERVILLE, SC – [Scienceceuticals, Inc.](http://www.scienceceuticals.com) is celebrating its 4<sup>th</sup> anniversary this month. Over the past four years, the company has experienced success within the contract manufacturing business and anticipates continued growth in the future.

[Donald Hayden](#), Founder and CEO of Scienceceuticals, began the business in 2005 after noting a void in the marketplace for a high quality, customer driven [contract manufacturer](#). He soon discovered the great opportunity within the contract manufacturing space, and more specifically, the cosmetic, OTC and drug arena.

“I knew contract manufacturing had great potential.” said Hayden, “When we saw a need within the cosmetics, OTC and drug fields, we moved quickly to fill that need.”

Since 2005, the company has seen a great amount of growth and success with double digit growth every year. But Hayden noted that the business hasn’t always been smiles and sunshine. He says the most difficult part during the start-up period was keeping up with customer demands and changing trends, but he calls this a “happy problem.”

“With the right employees, customers, goals, and objectives, we have been able to thrive and persevere in this business,” explained Hayden. “High customer demand is definitely a good problem to have.”

The company’s success is evident by the opening of its facility in Reno, Nevada in May 2009. Now with manufacturing facilities on both the east and west coasts, Scienceceuticals can greatly increase production and keep up with the “happy problem” of customer demand.

“We’re very proud of our success so far as a [cosmetics manufacturer](#), and it’s our goal to be the best in the business,” said Hayden. With such expansion and progress within just four years, the future looks bright for Scienceceuticals. The company hopes to continue the trend and keep pace with the ever changing market.

**About Scienceceuticals**

Scienceceuticals provides custom development, formulation, testing, manufacturing and distribution services to some of the world’s largest skin care, personal care, cosmetic, and pharmaceutical companies. Additionally, Scienceceuticals offers [private label skincare](#) and private label cosmetics product lines to a variety of industries. By linking its knowledge of chemistry and contract manufacturing to a thorough understanding of the cosmetics and skin care industry, Scienceceuticals helps customers seize opportunities, build brands and grow profits. With locations in New York, South Carolina, Nevada, California, and China, Scienceceuticals’ products and services are found around the world.
